

Please do not bow to the big business lobby group, the National Association of Broadcasters, and allow XM Satalite radio to be limited from providing local traffic and weather conditions. I drive an over the road truck and have come to depend on this information. It is extreamly helpful to have the traffic information at my finger tips and given to me without delay. X M covers the traffic in a manner that no broadcast station could or ever would.  
Thank You,

Kevin W. Reid
